

Midway Breakthroughs in the MIND4MACHINES Project

Open call 2 result and new accelerator programme

The MIND4MACHINES project continues to forge ahead, marking a significant milestone in its timeline. Recently, the project team gathered in Dresden, hosted by Silicon Saxony, for a pivotal onsite meeting. This article highlights the key advancements achieved during this juncture and sheds light on the outcomes of Open Call 2 (OC2). Moreover explores, it the enriching experiences and fruitful collaborations enjoyed by the project partners at the 17th Silicon Saxony Day, a renowned annual event within Europe's thriving microelectronics powerhouse... MIND4MACHINES Open Call 2 Results

OPEN CALL 2
AND THE WINNERS ARE..
FIND THEM ON OUR WEBSITE..!!

The MIND4MACHINES project launched the Open Call 2 (OC2) targeting the digitalization of the manufacturing industry. The call aimed to fund the development, testing, validation, and market uptake of Industry 4.0 solutions by technology provider SMEs and startups. Proposals involving collaborations between technology providers and industry partners were encouraged, with the industry partners acting as end-users of the proposed solutions.... [Read more](#)

Events

Consortium meeting

After three fruitful days, on June 21, we closed our third face-to-face Consortium meeting hosted by our partner Silicon Saxony in the great city Dresden. We focused on the second call results as well as the second round of our accelerator programme.

We are working hard to carry out our second accelerator programme successfully bringing the most benefit for our participants.

17th Silicon Saxony Day

Last June 21, we were hosted by our partner Silicon Saxony at their 17th edition of the Silicon Saxony Day.

It has been a great opportunity to meet and exchange information with local and European experts from science, research and industry high-tech ecosystem of Saxony, renowned as Europe's microelectronics powerhouse.

MIND4MACHINES Shines at National Annual Conference of Enterprise Europe Network Spain, Showcasing the Power of Cascade Funding in Europe

The recently held National Annual Conference of Enterprise Europe Network Spain became a platform for showcasing the success of Mind4Machines as a prime example of cascade funding in Europe.

This conference provided a valuable opportunity to demonstrate how cascade funding calls can effectively support the network in boosting the impact of funding mechanisms on European SMEs. Mind4Machines, with its innovative approach and exceptional results, emerged as a shining model of how cascade funding can drive growth and transformation for SMEs.

Assess your Company's Investment Readiness with the M4M IRL-Assessment!

Never used our IRL-Self-Assessment Tool? Be investment ready!

How "investment ready" is your company? Discover the answer by completing the IRL-Assessment to evaluate your company's strengths, weaknesses, and development potential. As an entrepreneurial team, it is crucial to understand your key competencies and gain a clearer picture of your project. This knowledge will be invaluable when pitching to investors or validating and scaling your business model.
